-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### DETAILED ACTION

1. Claims 1-39 are in the application.
2. The use of parenthetical expressions in claim 33 is objected to.

#### *Claim Rejections - 35 USC § 112*

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 14-16, 18-23, 25, 28, 34 and 35 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The elements recited in each of the above listed claims lack proper antecedent basis in the specification.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 2-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 2, 4-11, 25-33, and 35-37, there is no proper antecedent for "an equipment segment" in claim 1.

In claim 12 there is no proper antecedent for "the electrical network" in claim 11.

In claim 13, there is no proper antecedent for "the circuit breaker".

Art Unit: 3617

In claim 18, there is no proper antecedent for “the current limiting devices”.

In claim 19, there is no proper antecedent for “the individual switching devices”.

In claim 20, there is no proper antecedent for “the automation and control device”.

In claims 24 and 39 there is no proper antecedent for “the vessel protection section”.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

8. Claims 1-4, 7-9, 25 and 26 are rejected under 35 U.S.C. 102(e) as being anticipated by Rzadki et al (7,172,474).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the

Art Unit: 3617

inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Rzadki et al discloses a power generation and distribution power supply system and a propulsion system including at least one cruise propulsion system 43, 44 and at least an additional propulsion system 33, 36. The power supply system includes an AC network 30 and a DC network 22, 23. The system includes at least one fuel cell modules for generating electricity and at least one synchronous generator driven by a gas turbine (figure 2). The recitations of claims 7-9, 25 and 26 are disclosed by Rzadki et al on column 5, lines 61-67 and column 6, lines 1-54.

### *Conclusion*

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wolfe et al (5,678,647), Wilhelm (5,969,435), Thaxton et al (6,188,139), Ries et al (2005/0009418) and Levedahl (5417597) disclose propulsion systems using electric motors.
